TREASURER ☐

R. R. #1  
Grabill, Indiana  
November 13, 1967

Edwin Rousseau, President  
City Council  
City Hall  
Fort Wayne, Indiana

Dear Sir:

The Board of Directors of the Fort Wayne Chapter of the Izaak Walton League on November 8 formally moved to express opposition to the proposed covering of Harvester Ditch pending clarification of certain questions. This letter is for the record of the City Council on this subject.

The Board made note of the fact that the proposed covering, in and of itself, is completely irrelevant to the achievement of improved water quality. Taken alone, this covering will actually contribute to a worsened water quality problem, because beneficial biological activity of an exposed stream will be eliminated.

The proposed covering will tend also to conceal polluted conditions and delay pollution remedies. It will also make detection and anti-enforcement more difficult or impossible.

The State of Indiana has adopted water quality standards for the Maumee River into which the Harvester Ditch discharges. These standards, cited by the Department of the Interior as among the best in the nation, include partial body contact recreation, and qualities which will permit a healthy warm water aquatic life system.

Harvester Ditch by no means meets the test of those water qualities, and is in fact officially declared a major source of Maumee River pollution. Concealing this ditch will do nothing to remedy the problem, and the funds proposed for the project would be much better spent for legitimate pollution abatement systems.

Our Board also noted that those portions of Harvester Ditch which are not covered could actually contribute to the esthetics of the area through which it passes, including a city park. Some of the stream margins now form wildlife cover, and would be greatly enhanced by genuine anti-pollution remedies. If the pollutants in Harvester Ditch are eliminated or treated at the source, the stream could be one of the better assets of the area.

MADE A MATTER OF RECORD

DATE 11-14-67 RUAD G. BONAHOON, CITY CLERK

-2-

The Board has instructed me to forward copies of this position of our Chapter to State and Federal authorities which have an interest in the Maumee River water quality, and to ask them to join in our objection to covering Harvester Ditch until such time as the discharge of the ditch to the Maumee meets the water quality standards established for the river.

If the covering of this ditch is approved at this time, we are convinced that it will represent a serious setback in the achievement of the water qualities established for the Maumee River.

Sincerely,

Attached: AMENDED WATER QUALITY CRITERIA AND PLANS FOR IMPLEMENTATION  
Proposed by Stream Pollution Control Board of the State of  
Indiana March 1967.

AMENDED WATER QUALITY CRITERIA

AND

PLAN FOR IMPLEMENTATION

MAUMEE, ST. JOSEPH AND WHITEWATER RIVER BASINS

STATE OF INDIANA

Proposed

By

Stream Pollution Control Board of the State of Indiana

March, 1967

## INTRODUCTION

The Federal Water Quality Act of 1965 provides that States, after public hearings, and prior to June 30, 1967, may adopt water quality criteria applicable to interstate waters or portions thereof within the State and a plan for the implementation and enforcement of the water quality criteria adopted. In establishing such standards the State shall take into consideration all water uses.

The Stream Pollution Control Board was created by Chapter 214, Acts of 1943. This statute, as amended, provides for Board members and grants the Board control over the pollution of any waters of this State with the powers to adopt standards of water quality and to order abatement of pollution.

The Governor of Indiana, on December 1, 1965, advised the Federal Government that Indiana intends to establish required interstate water quality criteria. The criteria and plan for implementation adopted must be submitted to the Secretary of Interior.

During October, 1966, the Stream Pollution Control Board prepared a report on the Water Quality and Plan for Implementation on the Indiana Waters of the Maumee, St. Joseph and Whitewater River Basins. These reports were preparatory for hearings to be held for these basins on November 21, 1966, at Fort Wayne (Maumee), November 28, 1966, at South Bend (St. Joseph), and November 30, 1966, at Richmond (Whitewater).

The hearings were held and testimony was received concerning the proposed water quality criteria. After consideration of all of the testimony received, the Board has adopted amended proposed criteria.

The purpose of this report is to present these amended criteria and to categorize the water uses more explicitly. In addition, the implementation portion of the original report has been revised and is contained herein.

## PRESENT AND FUTURE WATER USES

### Summary of Water Uses

#### MAUMEE RIVER BASIN

1. All waters in the basin will be required to support a well-balanced, warm-water fish population and must be suitable for agricultural uses.
2. All waters, where natural temperatures permit, will be required to support put-and-take trout fishing.
3. All reservoirs and lakes and the St. Joseph River (Allen County) must be maintained for whole body contact recreation and all other streams for partial body contact recreation, such as boating, canoeing and fishing.
4. All waters which are used for public or industrial water supply must meet said criteria, and where needed for this purpose in the future, will meet the criteria.

#### ST. JOSEPH RIVER BASIN

1. All waters in the basin will be required to support a well-balanced, warm-water fish population and must be suitable for agricultural uses.
2. All waters, where natural temperatures permit, will be required to support put-and-take trout fishing.
3. All reservoirs and lakes in the basin and the St. Joseph River must be maintained for whole body contact recreation and all other streams for partial body contact recreation, such as boating, canoeing and fishing.
4. All waters which are used for public or industrial water supply must meet said criteria, and where needed for this purpose in the future, will meet the criteria.

#### WHITEWATER RIVER BASIN

1. All waters in the basin will be required to support a well-balanced, warm-water fish population and must be suitable for agricultural uses.
2. All reservoirs and lakes in the basin must be maintained for whole body contact recreation and all streams for partial body contact recreation, such as boating, canoeing, and fishing.
3. All waters which are used for public or industrial water supply must meet said criteria, and where needed for this purpose in the future, will meet the criteria.

#### PROPOSED AMENDED CRITERIA

The Board adopted the proposed amended criteria, for the waters of the Maumee, St. Joseph, and Whitewater River Basins. All waters, based on the use concept, will be required to meet the amended standards, as adopted in final form, for the appropriate public and industrial water supply, aquatic life, recreational, and agricultural uses mentioned previously.

## IMPLEMENTATION AND ENFORCEMENT PLAN

The Indiana Stream Pollution Control Board, under the present Indiana Stream Pollution Control Law (Chapter 214, Acts of 1943, as amended), has the required authority to control and prevent pollution in the waters of this State. All plans and specifications for abatement or correction of any polluted conditions shall be approved by the Stream Pollution Control Board.

The minimum weekly flow, which occurs once in 10 years, will be used in applying the standards. It is recognized that the all-time minimum flow will be less but will occur only a very small percentage of the time. During these periods, only minimum damage to the stream will result. The Board plans to assure compliance with the coliform standards for recreation during the recreational season of April through October, inclusive, and year-around for water supply. But it must be recognized that there are uncontrollable sources of coliform pollution other than sewage treatment plant effluents such as storm water runoff mentioned previously in this report. The Technical Secretary may make a determination to restrict whole body contact recreation when such waters are affected by storm water runoff.

The Board now conducts about 100 stream quality surveys per year and collects biweekly samples from 71 stream and lake sites. These will be increased within budgetary and personnel limitations.

The prompt and regular submission of monthly operational reports will be required of the treatment plants to enable evaluation of effluent quality. Further, where practicable, the Board will require the larger treatment facilities to initiate a downstream sampling program.

All those municipalities which have, or will be required to have, secondary sewage treatment facilities must provide the following removal of organic material in terms of BOD:

- (1) trickling filter plant - at least 80%, or
- (2) activated sludge plant - at least 90%

The characteristics of a receiving stream, including low flow, will continue to be used in determining the type of treatment required.

### A. Maumee River Basin

The Board will require construction of municipal treatment facilities in accordance with the following timetable:

1. Effluent chlorination facilities are to be provided by Avilla, Berne, Butler, Fort Wayne, Garrett, and Waterloo by the end of 1968.

2. Provision of adequate dilution water or installation of advanced waste treatment at Auburn, Decatur, Garrett, and Fort Wayne will be required within the next 10 years. Phosphate removal will be required at Fort Wayne as soon as practicable methods are developed.
3. The installation of sewers and sewage treatment facilities for incorporated communities with public water supplies and no recognized sewage treatment facilities will be required within the next 10 years. This includes Grabill, St. Joe and Woodburn.

The eight inadequate industries in the basin will be required to provide adequate treatment for the following contaminants by the end of 1968:

<u>Industry</u>	<u>Contaminants</u>
Kitchen-Quip, Inc. Waterloo <i>Cedar creek</i>	Suspended solids and heavy metals
Warner Automotive Division Borg-Warner Corporation Auburn <i>Cedar creek</i>	BOD, suspended solids and oil
Essex Wire Corporation Fort Wayne <i>St. Marys</i>	BOD, oil, heavy metals, phenols and suspended solids
Franke Plating Works, Inc. Fort Wayne <i>Maumee river</i>	Cyanide, heavy metals and suspended solids
International Harvester Company Fort Wayne <i>Harvester ditch</i>	BOD, oils and suspended solids
General Plating & Engineering, Inc. Fort Wayne <i>Maumee ditch</i>	Cyanide, heavy metals and suspended solids
Parrot Packing Company Fort Wayne <i>Maumee</i>	BOD, grease and suspended solids
Universal Tool and Stamping Company Fort Wayne	Cyanide and zinc

#### B. St. Joseph River Basin

The Board will require construction of municipal treatment facilities in accordance with the following timetable:

1. Secondary treatment facilities are to be provided by the City of Elkhart by the end of 1969 and by the City of Ligonier by the end of 1972. Said facilities are to include effluent chlorination.

2. Expansion of secondary treatment facilities will be required by South Bend and Mishawaka by the end of 1972.
3. South Bend is to provide effluent chlorination facilities as soon as practicable. Ashley, Goshen and LaGrange are to provide effluent chlorination by the end of 1972.
4. Treatment facilities, including effluent chlorination, are to be provided by Albion, Cromwell, Milford Junction, Topeka and Wakarusa on or before the end of 1972.
5. Installation of advanced waste treatment or provision for low flow augmentation will be required at Angola within the next 10 years.
6. Installation of sewers and sewage treatment facilities will be required within the next 10 years for incorporated communities with public water supplies and no recognized sewer system. This includes Middlebury, Millersburg and Wolcottville.

The five inadequate industries in the basin will be required to provide adequate treatment for the following contaminants by the end of 1969:

<u>Industry</u>	<u>Contaminants</u>
Bristol Band Instrument Company Bristol	Cyanide and heavy metals
Continental Can Company Elkhart	BOD, suspended solids and color
Middlebury Co-operative Creamery Middlebury	BOD and suspended solids
New Paris Creamery Company New Paris	BOD and suspended solids
Gentner Packing Company South Bend	BOD and suspended solids

#### C. Whitewater River Basin

The Board will require construction of municipal treatment facilities in accordance with the following timetable:

1. Spring Grove is to provide adequate sewage disposal for the rest of the community by the end of 1972.
2. Improvements to the Liberty sewage treatment facilities are to be provided on or before the end of 1972.

3. Effluent chlorination facilities are to be provided by Richmond by the time of completion of the Brookville Reservoir in 1970.
4. Effluent chlorination facilities are to be provided by Brookville and Oldenburg by the end of 1972.
5. Installation of advanced waste treatment or provision for low flow augmentation for Richmond will be required within 10 years. With the completion of the Brookville Reservoir, it may be necessary for Richmond to provide phosphate removal.
6. Installation of sewer and sewage treatment facilities will be required within the next 10 years for incorporated communities with public water supplies and no recognized sewer system. This includes Dublin, Laurel, Milton, and West College Corner.

Debolt Construction Company, Richmond, will be required to provide adequate facilities for treatment of sand and gravel washing water and Mercury Record Pressing Company, Richmond, will be required to provide adequate treatment of sewage by the end of 1967.

If it appears, at any time prior to the above dates, that there will not be compliance with the timetables, the Board will hold administrative hearings and issue orders to submit plans and specifications for abatement of pollution with a minimum time for completion of waste treatment facilities. In case of a failure to comply with an order, the Board has the power to and will commence action for enforcement of said order in the Circuit or Superior Court of the County in which the alleged violation occurs.

It is the plan of the Board that, where needed, the control of pollution caused by combined sewer overflows, the reduction of nutrients contributed by treated sewage effluents, and providing tertiary treatment should be accomplished within the next 10 years. The lack of practicable methods for implementing the above precludes establishing a finite timetable without further research and technology. Further, the Board plans to continue to work with local Soil and Water Conservation Districts regarding pollution control and water supply in the development of Small Watershed Protection and Flood Prevention Projects.

## INDIANA STREAM POLLUTION CONTROL BOARD

The Stream Pollution Control Board of the State of Indiana, at its regular meeting held at Indianapolis, Indiana, on February 21, 1967, at which meeting a quorum of members was present as provided by the Acts of 1943, Chapter 214, as amended by Acts of 1945, Chapter 132, Section 2, as found in Burns' Indiana Statute, 1961 replacement of 519, adopted the following new amended rules (Regulation SPC 18) concerning water quality standards for the Indiana waters of the Huron, St. Joseph, and Whitewater River Basins and a proposal to rescind the existing Regulation SPC 7, promulgated November 8, 1945:

### Regulation SPC 18 Water Quality Standards

#### MINIMUM CONDITIONS APPLICABLE TO ALL WATERS AT ALL PLACES AND AT ALL TIMES

1. Free from substances attributable to municipal, industrial, agricultural or other discharges that will settle to form turbid or otherwise objectionable sludge deposits.
2. Free from floating debris, oil, scum and other floating materials attributable to municipal, industrial, agricultural or other discharges in amounts sufficient to be unsightly or deleterious.
3. Free from materials attributable to municipal, industrial, agricultural or other discharges producing color, odor or other conditions in such degree as to create a nuisance.
4. Free from substances attributable to municipal, industrial, agricultural or other discharges in concentrations or combinations which are toxic or harmful to human, animal, plant or aquatic life.

#### S T R E A M - Q U A L I T Y   C R I T E R I A

#### FOR PUBLIC WATER SUPPLY AND FOOD PROCESSING INDUSTRIES

The following criteria are for evaluation of stream quality at the point at which water is withdrawn for treatment and distribution as a potable supply:

1. Bacteria: Coliform group not to exceed 5,000 per 100 ml as a monthly-average value (either MPN or MF count); not exceed this number in more than 20 percent of the samples examined during any month; nor exceed 20,000 per 100 ml in more than five percent of such samples.
2. Threshold-odor number: -Not-to-exceed-24-(at-66°F)-as-a-daily average.

2. Threshold-odor number: Taste and odor producing substances, other than naturally occurring shall not interfere with the production of a finished water by conventional treatment consisting of coagulation, sedimentation, filtration and chlorination. The threshold odor number of the finished water must be three or less.
3. Dissolved solids: Other than from naturally occurring sources not to exceed 500 mg/l as a monthly-average value, nor exceed 750 mg/l at any time. Values of specific conductance of 800 and 1,200 micromhos/cm (at 25°C.) may be considered equivalent to dissolved-solids concentrations of 500 and 750 mg/l.
4. Radioactive substances: Gross beta activity (in the known absence of Strontium-90 and alpha emitters) not to exceed 1,000 ~~micromicrocuries~~ picocuries per liter at any time.
5. Chemical constituents: Not to exceed the following specified concentrations at any time:

<u>Constituent</u>	<u>Concentration (mg/l)</u>
Arsenic	0.05
Barium	1.0
Cadmium	0.01
Chromium (hexavalent)	0.05
Cyanide	0.2 0.025
Fluoride	2.0 1.0
Lead	0.05
Selenium	0.01
Silver	0.05

#### FOR INDUSTRIAL WATER SUPPLY

The following criteria are applicable to stream water at the point at which the water is withdrawn for use (either with or without treatment) for industrial cooling and processing:

1. Dissolved oxygen: Not less than 2.0 mg/l as a daily-average value, nor less than 1.0 mg/l at any time.
2. pH: Not less than 5.0 nor greater than 9.0 at any time.
3. Temperature: Not to exceed 95°F. at any time.
4. Dissolved solids: Other than from naturally occurring sources not to exceed 750 mg/l as a monthly-average value, nor exceed 1,000 mg/l at any time. Values of specific conductance of 1,200 and 1,600 micromhos/cm (at 25°C.) may be considered equivalent to dissolved-solids concentrations of 750 and 1,000 mg/l.

## FOR AQUATIC LIFE

The following criteria are for evaluation of conditions for the maintenance of a well balanced, warm-water fish population. They are applicable at any point in the stream except for areas immediately adjacent to outfalls. In such areas cognizance will be given to opportunities for the admixture of waste effluents with river water.

1. Dissolved oxygen: Not less than 5.0 mg/l during at least 16 hours of any 24-hour period, nor less than 3.0 mg/l at any time.
2. pH: No values below 5.0 nor above 9.0 and daily-average (or median) values preferably between 6.5 and 8.5.
3. Temperature: Not to exceed 93°F. at any time during the months of May ~~April~~ through November, and not to exceed 73°F. 60°F. at any time during the months of December through ~~April~~ March.
4. Toxic substances: ~~Not to exceed one-tenth of the 48-hour median tolerance limit, except that other limiting concentrations may be used in specific cases when justified on the basis of available evidence and approved by the appropriate regulatory agency.~~
4. Toxic substances: Not to exceed one-tenth of the 96-hour median tolerance limit obtained from continuous flow bioassays where the dilution water and toxicant are continuously renewed, except that other application factors may be used in specific cases when justified on the basis of available evidence and approved by the appropriate regulatory agencies.
5. Taste and Odor: There shall be no substances which impart unpalatable flavor to food fish, or result in noticeable offensive odors in the vicinity of the water.
6. Trout streams: In addition the following criteria are applicable to those waters designated for put-and-take trout fishing:
  - (a) Dissolved oxygen: Not less than 6.0 mg/l as a daily-average value, nor less than 4.0 mg/l at any time.
  - (b) pH: Not less than 6.5 nor greater than 8.5 at any time.
  - (c) Temperature: Not to exceed 65°F. (However, slightly higher temperatures may be tolerated with higher dissolved oxygen content than specified.)

## FOR RECREATION

~~The following criterion is for evaluation of conditions at any point in waters designated to be used for recreational purposes, including such water contact activities as swimming and water skiing:~~

Bacteria: Coliform-group-not-to-exceed-1,000-per-100-ml-as-a monthly-average-value-(either-MPN-or-MF-count);-nor-exceed-this number-in-more-than-20-percent-of-the-samples-examined-during-any-month;-nor-exceed-2,400-per-100-ml-(either-MPN-or-MF-count) on-any-day.

#### FOR RECREATION

The following criteria are for evaluation of conditions at any point in waters designed to be used for recreational purposes:

1. Whole body contact: Coliform group not to exceed 1,000 per 100 ml as a monthly-average value (either MPN or MF count) (during any month of the recreational season); nor exceed this number in more than 20 percent of the samples examined during any month (of the recreational season); nor exceed 2,400 per 100 ml (either MPN or MF count) on any day during the recreational season. The months of April through October, inclusive, are designated as the recreational season.
2. Partial body contact: Coliform group not to exceed 5,000 per 100 ml as a monthly-average value (either MPN or MF count); nor exceed this number in more than 20 percent of the samples examined during any month; nor exceed 20,000 per 100 ml in more than five percent of such samples.

#### FOR AGRICULTURAL OR STOCK WATERING

Criteria are the same as those shown for minimum conditions applicable to all waters at all places and at all times.  
(The above replaces an enumeration of the four minimum conditions.)

Note 1: Unless otherwise specified, the term average as used herein means an arithmetical average.

Note 2: The analytical procedures used as methods of analysis to determine the chemical, bacteriological, biological, and radiological quality of waters sampled shall be in accordance with the latest edition of Standard Methods for the Examination of Water and Wastewater or other methods approved by the Indiana Stream Pollution Control Board and the Federal Water Pollution Control Administration.

The Technical Secretary of the Stream Pollution Control Board of the State of Indiana is hereby directed to cause the above proposed new amended rules to be duly published as provided by the Acts of 1945, Chapter 120, as found in Burns' IND. STAT. ANN., (1961 Repl.), Section 60-1501, et seq., for a public hearing to be held in Rice Auditorium, Indiana State Board of Health Building, 1330 West Michigan Street, Indianapolis, Indiana, at

10:00 a.m., EST, (9:00 a.m., CST), on the 17th day of March, 1967, and said Technical Secretary shall keep on file in the office of said Technical Secretary, the Library of the Supreme Court of Indiana, and the Office of the Attorney General for public inspection, at least five (5) copies of such proposed new rules and proposal to rescind existing Regulation SPC 1.

---

Charles L. Sidle, Chairman  
Stream Pollution Control Board  
of the State of Indiana

A - Adequate

I - Inadequate

November 14, 1967

Mr. John Nuckols, Chairman  
Public Works Committee  
The Common Council  
City Hall  
Fort Wayne, Indiana

Gentlemen:

Contract covering Resolution No. 188-1967 for Harvester Ditch, Phase III, with Weikel Construction Company, Inc., is being introduced today in the amount of \$58,605.70

It is important that this project be completed as promptly as possible and the contractor is ready to proceed; therefore, we ask for advanced approval on same.

Very truly yours,

BOARD OF PUBLIC WORKS

Fred S. Ehrman, Chairman

FSE:jc

APPROVED:

MEMBERS OF THE COMMON COUNCIL

November 14, 1967

Mr. John Nuckols, Chairman  
Public Works Committee  
The Common Council  
City Hall  
Fort Wayne, Indiana

Gentlemen:

We have today issued Purchase Order No. 24830 to L. W. Dailey Construction Company for replacing pavement on South Wayne Avenue from a point 100 feet south of the south property line of Oakdale Drive to a point 50 feet south thereof.

Inasmuch as the contractor cannot start a large pavement job, he has agreed to do this project immediately and since we have been more than two years getting same accomplished, we ask that you give advanced approval in order that the contractor may proceed.

An ordinance covering this purchase order will not be introduced until November 28th.

Very truly yours,

BOARD OF PUBLIC WORKS

*Fred S. Ehrman*  
Fred S. Ehrman, Chairman

FSE:jc

APPROVED:

*John Nuckols*  
*William T. ...*  
*James P. ...*  
MEMBERS OF THE COMMON COUNCIL

The Council then adjourned.

#### CERTIFICATE

I hereby certify that I am the duly elected, acting and incumbent City Clerk of the City of Fort Wayne, Indiana and as such the custodian of the records of the Common Council of said city and that the above and foregoing is the true, full and complete record of the proceedings of the Common Council of the City of Fort Wayne, Indiana for its Regular Session, held on Tuesday, the 14th day of November, 1967; that the numbered ordinances ~~shown therein~~ <sup>and resolutions</sup> were duly adopted by said Common Council on said date and were presented by me to the Mayor of the City of Fort Wayne and were signed and approved or disapproved by said Mayor as and on the dates shown as to each such ordinance <sup>and resolution</sup> respectively; and that all such records, proceedings ~~and~~ <sup>resolutions</sup> ordinances remain on file and record in my office.

WITNESS my hand and the official seal of the City of Fort Wayne, Indiana, this 14th day of November, 1967.

Fuad G. Bonahoom  
~~Walter G. Meyers~~  
City Clerk
